COURSE CATALOG

Friday - 3/25/2022**4pm-5:40pm****Florida Ballroom BC**- Mario Fucinari, DC, CCSP,
DAAPM, MCS-P**Documentation****Proving Medical Necessity in Any Type of Case****Course Description**

More than ever, chiropractors are under pressure to prove medical necessity in the care we provide for our patients. Perhaps you received the recent Comparative Billing Report from Medicare, or worse, an audit. What criteria are they looking for in your documentation to prove that the care you rendered was medically necessary? Whether it be Medicare, commercial insurance, or personal injury, medical necessity must be shown. Learn from a certified compliance officer and seasoned practitioner of 35 years how to incorporate the requirements for medical necessity in your documentation to rise up against audits and recoupment.

Learning Objectives

- Understand government regulations and industry trends
- Determine Function's role in insurance policies
- Establish procedures for consultation and examination essentials
- Integrate outcome assessment tools to develop treatment goals
- Learn documentation guidelines and requirements

DABCO**Acupuncture Risk Mgmt
(Acup. Cert. DC's ONLY)****Risk Management for Sleep Disorders****Course Description**

Sleep is as fundamental to life as water and food. Sleep is essential for the brain to recover, recharge, and remove toxins at the end of each day. It allows for the formation of new synapses, consolidation of memories, and regeneration of neurons. Unfortunately, high stress levels, artificial lights, and fast-paced lifestyles mean that people are getting low quality sleep, and less of it. Chronic sleep loss dramatically impairs cognitive function but it has also been implicated in obesity, cardiovascular disease, and psychiatric, gastrointestinal, and reproductive disorders.

Learning Objectives

- Identify types of sleep disorders
- Learn how to address sleep disorders with chiropractic and acupuncture

Documentation

Understanding Your Audience is Vital in Documenting an Initial Visit

Course Description

Documentation for an initial visit or new episode shouldn't take all day! But how do you know what is too much and what isn't enough? With increased regulations and policies, your documentation can take more time than the time spent with the patient. We all know that more patient visits equal increased revenue and feeling like you must write the next best-selling novel only keeps you from reaching your fullest potential. Knowing your audience will often guide you through the level of documentation needed. Many offices fail to understand that documentation plays one of the most critical roles in their practice finances. We hear it all the time, "I don't have a problem with my documentation; I am getting paid for everything I am doing." But we wonder if they have looked to make sure.

We'll identify which missing components can become critical issues for your practice, along with the steps you can take immediately to better communicate through documentation to provide better protection for your practice and your patients.

Learning Objectives

- Learn to identify payer requirements as part of your documentation standards
- Identify and apply concepts that differentiate types of initial visits- new patients and updated episodes
- Produce documentation of initial visits that comply with the Medicare requirements for chiropractors
- Summarize documentation requirements as they apply to the new initial Evaluation and Management guidelines set forth January 1, 2021
- Establish medical necessity for your care and know with surety that initial visit documentation is complete
- Explain and apply Medicare's PART process of examination to document the presence of a subluxation

Leadership Mastery: The Purpose, People, and Process Path to Remarkable Growth

Course Description

Risk management starts at the top. Leaders who do not develop and improve their leadership and communication skills leave themselves vulnerable to a wide variety of risks. Leadership styles and their associated effectiveness have gone through a massive evolution and will continue to advance. This interactive session will focus on implementing the most innovative and effective leadership concepts of the 21st century to reduce risks to your practice related to both employees and patients. Mission-critical content with the practical applications from the leadership literature, provides an evidence-based approach to reducing risk. Leaders in attendance will be surveyed to discover their own leadership style and areas of risk. Discussion reducing risk and improving outcomes through appropriate and ethical use of Purpose, People, and Process will be the guidepost for practices moving forward. The mix of concept and application will give practice leaders not only the ammunition, but also the "guns" to hit their goals and do it in a way that minimizes, if not eliminates, risk.

Learning Objectives

- Understanding the science of self-awareness and emotional intelligence to improve communication skills and teamwork
- Understanding the science of human motivation, and how we can reduce risk of employee challenges through behavior change science
- Learning and applying role-based employment and how to interview, hire, develop and fire for maximal results
- Learning and applying evidence-based quantitative process management to eliminate defects, reduce clinical, administrative, HR and financial risks
- Understanding the science of a mission and values driven practice to stay on the ethical path to communication, practice culture, and growth

Documentation

Documenting and Coding in 2022

Course Description

2020 has brought changes in many of the ICD-10 codes used daily by many chiropractors. This course will give an overview of how an ICD-10 code is constructed and what many of the changes of interest to the chiropractic profession have been.

Additionally, 2021 will see changes in Evaluation and Management codes impacting practices across the healthcare spectrum. Attendees will learn these what these changes are and how to select the proper E&M code for the services they provide using the new guidelines.

This course will also include an overview of proper coding modifiers that are now needed for proper reporting and reimbursement of many of the services that form the core of what chiropractors offer in their practices today.

Learning and implementation of this information will not only be vital for documentation purposes but also serves as compliance training for the doctor and his/her staff that should be part of the practice's compliance program.
