Documentation

Proving Medical Necessity in Any Type of Case

Course Description

More than ever, chiropractors are under pressure to prove medical necessity in the care we provide for our patients. Perhaps you received the recent Comparative Billing Report from Medicare, or worse, an audit. What criteria are they looking for in your documentation to prove that the care you rendered was medically necessary? Whether it be Medicare, commercial insurance, or personal injury, medical necessity must be shown. Learn from a certified compliance officer and seasoned practitioner of 35 years how to incorporate the requirements for medical necessity in your documentation to rise up against audits and recoupment.

Learning Objectives

- Understand government regulations and industry trends
- Determine Function's role in insurance policies
- Establish procedures for consultation and examination essentials
- Integrate outcome assessment tools to develop treatment goals
- Learn documentation guidelines and requirements

Documentation

Understanding Your Audience is Vital in Documenting an Initial Visit

Course Description

Documentation for an initial visit or new episode shouldn't take all day! But how do you know what is too much and what isn't enough? With increased regulations and policies, your documentation can take more time than the time spent with the patient. We all know that more patient visits equal increased revenue and feeling like you must write the next best-selling novel only keeps you from reaching your fullest potential. Knowing your audience will often guide you through the level of documentation needed. Many offices fail to understand that documentation plays one of the most critical roles in their practice finances. We hear it all the time, "I don't have a problem with my documentation; I am getting paid for everything I am doing." But we wonder if they have looked to make sure.

We'll identify which missing components can become critical issues for your practice, along with the steps you can take immediately to better communicate through documentation to provide better protection for your practice and your patients.

Learning Objectives

- Learn to identify payer requirements as part of your documentation standards
- Identify and apply concepts that differentiate types of initial visits- new patients and updated episodes
- Produce documentation of initial visits that comply with the Medicare requirements for chiropractors
- Summarize documentation requirements as they apply to the new initial Evaluation and Management guidelines set forth January 1, 2021
- Establish medical necessity for your care and know with surety that initial visit documentation is complete
- Explain and apply Medicare's PART process of examination to document the presence of a subluxation

Saturday - 3/26/2022**8am-9:40am****Florida Ballroom BC**- Jay S. Greenstein, DC, CGFI-L1, - Brad Cost
FMS**Ethics****Technological Approach to Patient Reimbursement & Outcomes...Keeping Things Ethical****Course Description**

It is our ethical responsibility as cutting-edge physicians to understand and use technology as it relates to reimbursement and improving patient outcomes. It is easy to remain comfortable with your current level of technology, but with comfort and lack of knowledge, how quickly it is too loose allow marketing networks to exceed outcomes and patient safety. Attendees will learn how to leverage data to ensure ethical business practices, compare norms and trending in this new day and age.

Learning Objectives

- Ethically differentiate technology as it relates to reimbursement
- Understanding emerging technologies to improve patient outcomes, population health, and patient safety and security
- Utilize emerging technology and BIG DATA

Risk Management

Hormonal Influences of the Female Menstrual Cycle

Course Description

This course takes the practicing physician on a journey of common conditions presented by the female patient from the onset of menarche through the post-menopausal state. Conditions reviewed in this session include benign breast conditions, PMS, pelvic pain syndromes, abnormal uterine bleeding, thyroid dysfunction, and infertility. Topics explored include obtaining a pertinent gynecological history, interpretation of physical examination and diagnostic laboratory findings, and the general evaluation and treatment management of physical and hormonal imbalances as they relate to the presenting female patient.

Learning Objectives

- Formulate a pertinent detailed history and physical examination procedures as they apply to the female patient of childbearing years and menopause.
- Understand and directly apply the hormonal interpretations as they relate to the female menstrual cycle and conditions associated with pelvic pain, abnormal uterine bleeding, amenorrhea, and infertility.
- Explain the pathophysiology of stress related hormonal imbalances that result in symptoms associated with premenstrual syndrome (PMS), thyroid dysfunction and menopause.

- Integrate appropriate treatment and management of common female conditions including dietary assessment, nutritional and supplemental support as well as chiropractic and complementary alternative therapies.

The Brain Lab for the Modern Chiropractor- Moving Toward a Brain Based Model

Course Description

As innovative physicians, Chiropractors continue to integrate approaches into their delivery which allow and enhance the body and brain's ability to heal, recover, and perform. We look at low-tech and high-tech therapies that can upgrade a physician's outcomes and quantify the biometrics pre/post treatments.

"Neurotechnology is any technology that has a fundamental influence on how people understand the brain and various aspects of consciousness, thought, and higher order activities in the brain. It also includes technologies that are designed to improve and repair brain function and allow researchers and clinicians to visualize the brain."

Learning Objectives

- Recognize the Neurology Chiropractic Impacts
- Brain-based education/examinations
- Brain-based patient education

Sunday - 3/27/2022**8am-9:40am****Florida Ballroom BC****- Jeff Lewin, DC, CCSP****Medical Errors****Prevention of Medical Errors****Course Description**

This two-hour course will focus on the many errors that occur in the healthcare and medical community. The steps that have already been taken and additional methods that still can be initiated to prevent these adverse events from happening in the future will be discussed. The chiropractic errors and adverse events will be studied with the occurrence rates and statistics to establish their relevance. The preventative measures that clinicians can initiate to minimize the medical error rate in their private practice will be reviewed.

*Sponsored by: Eclipse***10am-11:40am****Florida Ballroom BC****- Kristi Hudson, CPCO****Documentation****Meeting the Expectations for Medicare Clinical Documentation****Course Description**

Healthcare is the second most regulated industry in our country. The Office of Inspector General (OIG) has issued reports for the last several years identifying key issues related to chiropractic billing and documentation.

Learning Objectives

- Gain a better understanding of the law
- Identify the 4 major areas of concern
- Documentation must have for initial and subsequent visits
- Steps for monitoring your practice

*Sponsored by: ChiroHealth USA***1pm-2:40pm****Florida Ballroom BC****- Mark N. Charrette, DC****Risk Management****Managing Risks on Popular Extremity Adjustments****Course Description**

This course is a "hands-on" workshop designed after the principles of DELIBERATE PRACTICE. Documentation

Documenting and Coding in 2022

Course Description

2020 has brought changes in many of the ICD-10 codes used daily by many chiropractors. This course will give an overview of how an ICD-10 code is constructed and what many of the changes of interest to the chiropractic profession have been.

Additionally, 2021 will see changes in Evaluation and Management codes impacting practices across the healthcare spectrum. Attendees will learn these what these changes are and how to select the proper E&M code for the services they provide using the new guidelines.

This course will also include an overview of proper coding modifiers that are now needed for proper reporting and reimbursement of many of the services that form the core of what chiropractors offer in their practices today.

Learning and implementation of this information will not only be vital for documentation purposes but also serves as compliance training for the doctor and his/her staff that should be part of the practice's compliance program.
