Clinical CE**Vaccines and Autism - A View that Avoids the Radicals and Authoritarians****Course Description**

The debate about vaccines and autism has been reduced to either being pro-vax or anti-vax. These two rigid positions do not allow for a deeper understanding about the nature of autism, which includes the history of infectious disease, hygiene improvements vs vaccines, and predisposing factors including genes, maternal inflammation, and infant neuroinflammation. This class will provide a metacontextual view from which the debate can be considered from a more rational perspective.

Learning Objectives

- Discuss the history of autism before and after vaccines
- Describe autism from a metacontextual perspective that includes multiple promotional factors that are currently not part of the standard debate
- Propose a more rational debate about autism expression to improve patient awareness and public health

Your Ethical Duty: The Obesity Epidemic**Course Description**

Chiropractic's moral courage in healthcare is needed now more than ever before. In October of 2017, the CDC Newsroom presented a press release, "Cancers Associated with Overweight and Obesity Make Up 40 Percent of Cancers Diagnosed in the United States" with more than 630,000 in the United States affected.* This report came after the National Institute of Health released news and reports from the New England Journal of Medicine that "Rates of new diagnosed cases of type 1 and type 2 diabetes on the rise among children, teens", fastest rise seen among racial/ethnic minority groups.** As chiropractors, we are trained to look at the body differently and take in to consideration the environment, food, genetics, etc. when looking to improve patient health. Our ethical duty is being called on us now more than ever. This is an up-and-coming crisis for our country that our profession has the ability to affect very positively, but we must be reminded of the changing reasons in our world that has set our country up, to lead in this increasing disaster.

Triaging Athletes with Healthcare Professionals: Risk Factors for Every Practice**Course Description**

It is still public perception that the athletic medical team doesn't include chiropractic care. Contrary to this belief, this panel discussion will use case studies showcasing the most difficult cases and how chiropractic plays an integral role in the improvement of athletes, allowing them to return-to-play quicker, with more accuracy and better health. The collective team approach will be illustrated by multiple disciplines with multiple specialties giving advice on each case, symbolic of an athletic team working together for the collective healing of the athlete. Highlighted throughout the session, is the risk of not having a chiropractor involved in athletics and how this miss can be detrimental to the team. The evidence conveyed in this lecture will be applicable from professional team sports, as well as pee-wee athletes and all ages in between. Becoming familiar with the chiropractic role in helping athletes is a great practice builder, and knowing the risks the athlete can avoid could be life changing.

Learning Objectives

- Establish working relationships with local high schools, coaches, trainers, and doctors that will expand your practice
- Develop an emergency action plan to promote safety at sporting events
- Understand the history of the Paralympic movement, and why there has been a recent spike in disabled athletes
- Learn how to recognize, and treat, the most serious medical issues that disabled athletes are likely to experience

The National Issue of Opioids: Conservative Care to Help Patients Avoid Medical Errors

Course Description

Opioid over-prescription has reached epidemic proportions. According to the Centers for Disease Control and Prevention, from 1999 to 2015, more than 183,000 people have died in the U.S. from overdoses related to prescription opioids. In the battle to save lives, you are on the front-lines caring for patients & families who are vulnerable and in pain. It has been cited as a leading cause of new heroin addiction. The American Public Health Association has prioritized opioid use as a key health concern. With many prescriptions related to spinal pain. This presentation will outline the role of chiropractors and others delivering sustainable conservative solutions.

Expanding Your Scope of Practice Hidden in Plain Sight within Chapters 460 & 456

This class is for Florida Doctors ONLY

Course Description

The conversation with "George Washington" concerning the updated Florida law and recent rules, as well as a demonstration of the best way to grow your chiropractic practice all within the laws. A panel of speakers with experience in specializations including sports, nutrition, neurology, and posture, have been invited by FCA's General Counsel to share case studies in each niche of chiropractic. FCA General Counsel, Paul Lambert, will illustrate how the Florida Law supports the authority of DC's to give the highest and best care, and how this is best done under a large scope of practice. This early morning session will illustrate how the application of patient cases and patient outcomes augments practice success, as well as how the law in Florida supports this philosophy. This session is bound to uplift and enlighten as you hear your favorite clinicians refer to their own clinical case studies with truths that will reignite your passion for chiropractic as well as your interest in utilizing the full scope of practice here in Florida.

Why Chiropractors are Uniquely Positioned to Treat TBI's and What the Research has to Say

Course Description

In this 2 hours presentation participants will learn how toxins are a major contributing factor in the 21st Century neurological epidemic. Dr. Patrick Porter (PhD) will share key statistics, symptoms and how these toxins affect your patients, community and practice. The link between chiropractic and brain function will be explored and how the recent outcry for a solution to Traumatic Brain Injuries (TBIs) and the unique qualities of chiropractic have perfectly positioned doctors of chiropractor to handle these cases. Participants will also learn how low level light therapy has helped to bring relief to those suffering from brain stress.

Participants will practice using these cutting-edge insights on how brain stress leads to Sympathetic Survival Syndrome and how specific language patterns can reduce or eliminate patient stress. We will explore the consequences of imbalance between the sympathetic and parasympathetic nervous system and how thoughts can be changed to use the new science of epigenetics to bring the nervous system and brain into balance.

Learning Objectives

- Learn how toxins are a major contributing factor in the 21st Century neurological epidemic
- Learn how low level light therapy has helped to bring relief to those suffering from brain stress

- Practice using these cutting-edge insights on how brain stress leads to Sympathetic Survival Syndrome

Advanced Lower Extremity Adjusting - Parts 1a & 1b

Course Description

This 4-hour hands-on presentation covers basic biomechanics, neurology, examination procedures, indicators, and adjusting protocols for the most common subluxation patterns of the feet that are found in the typical practice. The concept of "The Noisy Joint" will be covered in detail.

This course is a "hands-on" workshop designed after the principles of DELIBERATE PRACTICE. The doctor/student will quickly acquire adjusting skills for the most commonly encountered extremity conditions. Also covered in this course are simple stabilization and rehabilitative procedures for the lower extremity.

Learning Objectives

- Understand and demonstrate the seven adjustments for the foot pronation protocol to include navicular, cuboid, cuneiforms, metatarsal heads, talus, calcaneus, and fibular head
- Understand and demonstrate the wrist extension adjustment for the knee utilizing listings of 1) medial condyle, 2) lateral condyle, and 3) posterior tibia
- Understand and demonstrate the indicator and adjustment for the hip utilizing the wrist extension thrust

Integration of Chiropractic Care into Mainstream Healthcare

Course Description

Chiropractors often feel isolated in the discussion of mainstream healthcare, believing an equal seat at the healthcare table is far fetched. This class will prove that this isolated thinking is a way of the past, and the future of healthcare depends on integration of chiropractic, now more than ever; yet it is our job to communicate this effectively. We have invited a panel of doctors to illustrate how documentation and record keeping are communication tools that allow us to interact with the allopathic community. Documented results from Gallup Poll #3 will be followed by chiropractors focusing on different areas of interactive success between chiropractors and the medical model, showcasing how the collaborative community has the greatest benefit for patients. If chiropractic is to take a prominent seat at the healthcare table, it will have to do so with research, statistics, an established outlined path as described by the participants in this panel, and in a spirit of cooperation. With the climate of society and ever-changing-healthcare, the time is NOW!

Multidisciplinary Practices: Can I, Should I and How Do I Integrate My Practice?

Course Description

If you're thinking about integrating your practice or looking to improve your existing multi-specialty practice, then consider attending this session. Do not jump into practice integration without doing your homework.

This session will help you learn the pros and cons of practice integration. Dr. Kotlar will address how to work with physical therapists, nurse practitioners, medical doctors and acupuncturists. This session will cover corporate structure, Stark and Anti-Kickback statutes, how to code and document for common integrated services, QHPs vs clinical staff, credentialing, patient flow, supervision levels and HIPAA compliance.

Learning Objectives

- Identify the key components of practice integration
- Understand the relationships between DCs, PTs, MDs, NPs and acupuncturists
- The collaborative approach to treating the most common conditions seen in multidisciplinary practices

Adjusting for Success: The Thoracic

Course Description

You will discover how the patient's position influences the success of your adjustment through a new approach never taught before: The Arc of Tension. The techniques that never provided you a reliable cavitation will become suddenly highly efficient in your hands. You will practice chiropractic like the kata of any martial art: first without a patient, you duplicate standing the movement projected on screen; second with a patient as you did before.

Learning Objectives

- Multiply the efficacy of your daily chiropractic technique via patient's positioning
- Explain what has never been explained before: the simple mechanic behind cavitation
- Demonstrate the common factors to all adjustment throughout the spine with the Arc of Tension model
- Show doctors how to document for duplication a technique in less than 3 seconds with any documentation system so you can take off any time, any day, without the need to demonstrate anything to the new doctor covering for you.

Risk Management

Reducing Risk for Females, Tweens, Teens and Young Adults, Oh My!

Course Description

This population of young females seems to be changing by the moment; accelerated age of puberty, increased societal impacts such as medication usage and unnecessary surgical procedures. Due to these external factors practitioners are seeing many conditions arising within this patient population that in the past would affect much older individuals. The age of the patient has become irrelevant to the physiological journey. Educating our families and young women on wellness has never been more important. During this class session a review of this patient populations' most commonly seen conditions along with treatment options and educational strategies will be discussed for easy implementation for Monday morning practice.

Learning Objectives

- Discuss the most commonly seen conditions in the female tweens, teens and young adult population
- Summarize the impact of society on this patient population and how to continue to educate our patients and families on wellness of young females
- Explore a variety of treatment options which correlate to conditions presenting in this patient population
- Discuss patient education strategies for this patient population and how it can have impact on the wellness of these young women

Opioid Use in Special Populations: The Impact on your Patients

Course Description

The United States is facing an opioid crisis, have you thought about how this impacts your patients? It is well known that prescription rates for these painkillers vary depending upon geographical location, with southern states demonstrating a higher rate. During this session Dr. Petrocco-Napuli will discuss the impact of the opioid epidemic on special populations throughout the US and how that directly impacts your patient population in Florida. As this crisis does not discriminate, practitioners it is incredibly important that the focus on our varying patient populations be considered: pediatrics, female health: including pregnancy, geriatrics and veteran's. Throughout this session, opioid utilization and the effects on patient centered inter-collaborative care will be discussed.

Learning Objectives

- Discuss and define the impact of the opioid crisis on special populations throughout the United States and Florida
- Describe and discuss provider and patient education strategies related to a non-pharmacological approach to pain management
- Discuss and summarize how chiropractic treatment is an important component to assist in solving this crisis

Documentation

Accurate Documentation from a Forensic Viewpoint

Course Description

This 2 hour program will expand the physician's knowledge of documentation, record keeping and coding. The perspective will be from the outsider looking at clinical records during an audit review. The class will also be from an expert witness' perspective for who must evaluate the credibility of the physician's records during a deposition or trial. The current guidelines and scientific evidence will be discussed to determine reasonable utilization parameters. The course will provide the attendee information to be more adept in presenting his/her clinical notes in a more logical and in a manner to increase the credibility of the records. The attendee will be able to document in a more organized manner the next day in the office.

Learning Objectives

- Discuss the current guidelines and scientific evidence to determine reasonable utilization parameters
- Review information to be more adept in presenting his/her clinical notes in a more logical and in a manner to increase the credibility of the records
- Learn how to document in a more organized manner

Reducing Risk for Females, Tweens, Teens and Young Adults, Oh My!

Course Description

This population of young females seems to be changing by the moment; accelerated age of puberty, increased societal impacts such as medication usage and unnecessary surgical procedures. Due to these external factors practitioners are seeing many conditions arising within this patient population that in the past would affect much older individuals. The age of the patient has become irrelevant to the physiological journey. Educating our families and young women on wellness has never been more important. During this class session a review of this patient populations' most commonly seen conditions along with treatment options and educational strategies will be discussed for easy implementation for Monday morning practice.

Learning Objectives

- Discuss the most commonly seen conditions in the female tweens, teens and young adult population
- Summarize the impact of society on this patient population and how to continue to educate our patients and families on wellness of young females
- Explore a variety of treatment options which correlate to conditions presenting in this patient population
- Discuss patient education strategies for this patient population and how it can have impact on the wellness of these young women
