Vaccines and Autism - A View that Avoids the Radicals and Authoritarians

Course Description

The debate about vaccines and autism has been reduced to either being pro-vax or anti-vax. These two rigid positions do not allow for a deeper understanding about the nature of autism, which includes the history of infectious disease, hygiene improvements vs vaccines, and predisposing factors including genes, maternal inflammation, and infant neuroinflammation. This class will provide a metacontextual view from which the debate can be considered from a more rational perspective.

Learning Objectives

- Discuss the history of autism before and after vaccines
- Describe autism from a metacontextual perspective that includes multiple promotional factors that are currently not part of the standard debate
- Propose a more rational debate about autism expression to improve patient awareness and public health

Chiropractic Ethical Obligation in the Obesity Epidemic

Course Description

Chiropractic's moral courage in healthcare is needed now more than ever before. In October of 2017, the CDC Newsroom presented a press release, "Cancers Associated with Overweight and Obesity Make Up 40 Percent of Cancers Diagnosed in the United States" with more than 630,000 in the United States affected. This report came after the National Institute of Health released news and reports from the New England Journal of Medicine that "Rates of new diagnosed cases of type 1 and type 2 diabetes on the rise among children, teens", fastest rise seen among racial/ethnic minority groups.

As chiropractors, we are trained to look at the body differently and take in to consideration the environment, food, genetics, etc. when looking to improve patient health. Our ethical duty is being called on us now more than ever. This is an up-and-coming crisis for our country that our profession has the ability to affect very positively, but we must be reminded of the changing reasons in our world that has set our country up, to lead in this increasing disaster.

HIV/AIDS

HIV/AIDS: Everything a Doctor Should Know About This Disease & What to Do About It

Course Description

More than 1.2 million people in the United States are living with HIV infection. It is estimated that almost 1 in 8 (12.8 percent) don't know they are infected. From 1981 to 2013, an estimated 1,194,039 people in the United States had been diagnosed with AIDS. Of those, 658,507 have died.

Prof. Dr. Paul Ling Tai provides a thorough look at fundamental information regarding the testing, diagnosis and treatment HIV & AIDS Infections. Dr. Tai promotes treating patients in a respectful and professional manner, while helping them to prevent or manage HIV or AIDS.

Learn to help correct the symptoms of HIV & AIDS that affect patients' quality of living, such as Neurological Disease, Brain Fog, Fatigue, Adrenal Disorders, Fibromyalgia, G.I. Disorders, Muscle Spasticity and many more with Complete Nutritional & Natural Supplement Treatment Protocol.

Let this lecture shape you into a well-polished, professional and most of all capable physician, able to provide care for patients with HIV or AIDS with Confidence.

Learning Objectives

- Understand the HIV Virus and its progression into AIDS
- Learn to Identify the Signs, Symptoms & Stages of the HIV Virus
- Learn to Test for, Diagnose & Treat HIV Infection
- Explore Social Aspects of living with HIV Infection
- Learn Complete Nutritional & Natural Supplement Treatment Protocol for Symptoms of HIV & AIDS

How to Document and Code When Triaging Athletics with Healthcare Professionals

Course Description

It is still public perception that the athletic medical team doesn't include chiropractic care. Contrary to this belief, this panel discussion will use case studies showcasing the most difficult cases and how chiropractic plays an integral role in the improvement of athletes, allowing them to return-to-play quicker, with more accuracy and better health. The collective team approach will be illustrated by multiple disciplines with multiple specialties giving advice on each case, symbolic of an athletic team working together for the collective healing of the athlete. Highlighted throughout the session, is the risk of not having a chiropractor involved in athletics and how this miss can be detrimental to the team. The evidence conveyed in this lecture will be applicable from professional team sports, as well as pee-wee athletes and all ages in between. Becoming familiar with the chiropractic role in helping athletes is a great practice builder, and knowing the risks the athlete can avoid could be life changing.

Learning Objectives

- Establish working relationships with local high schools, coaches, trainers, and doctors that will expand your practice
- Develop an emergency action plan to promote safety at sporting events
- Understand the history of the Paralympic movement, and why there has been a recent spike in disabled athletes
- Learn how to recognize, treat, document and code the most serious medical issues that disabled athletes are likely to experience

The National Issue of Opioids: Conservative Care to Help Patients Avoid Medical Errors

Course Description

According to the Centers for Disease Control and Prevention, from 1999 to 2015, more than 183,000 people have died in the U.S. from overdoses related to prescription opioids. It has been cited that 4 of 5 current heroin addicts say they came to the drug through prescription opioids. The American Public Health Association has prioritized opioid use as a key health concern since 1 in 4 users of prescribed painkillers become addicted; many prescriptions related to spinal pain. In the battle to save lives, the public is looking for alternatives and you are on the frontlines caring for patients & families who are vulnerable and in pain. Last year, was focused on awareness; this year this lecture will help you avoid medical errors while navigating through this increasing domestic crisis:

- Addicted patient recognition / diagnostic and treatment protocol improvements
- Global perception, Domestic legislative changes that effect your treatment ability
- Research tools that support sustainable care for pain and addiction alike
- Inferring the research, improving patient intake forms and communication protocols of the DC and Staff alike.

Advanced Lower Extremity Adjusting - Parts 1a & 1b

Course Description

This 4-hour hands-on presentation covers basic biomechanics, neurology, examination procedures, indicators, and adjusting protocols for the most common subluxation patterns of the feet that are found in the typical practice. The concept of "The Noisy Joint" will be covered in detail.

This course is a "hands-on" workshop designed after the principles of DELIBERATE PRACTICE. The doctor/student will quickly acquire adjusting skills for the most commonly encountered extremity conditions. Also covered in this course are simple stabilization and rehabilitative procedures for the lower extremity.

Learning Objectives

- Understand and demonstrate the seven adjustments for the foot pronation protocol to include navicular, cuboid, cuneiforms, metatarsal heads, talus, calcaneus, and fibular head
- Understand and demonstrate the wrist extension adjustment for the knee utilizing listings of 1) medial condyle, 2) lateral condyle, and 3) posterior tibia
- Understand and demonstrate the indicator and adjustment for the hip utilizing the wrist extension thrust

Laser Therapy: Science, Treatments and Managing Risk

Course Description

This 2-hour lecture will define and discuss parameters pertinent to laser therapy including wavelength, ionizing & non-ionizing radiation, power, power density, dosage, photochemical, photothermal. Current topics in laser safety, laser treatment adverse events, informed consent and state laws will be reviewed and discussed. Attendees will leave knowing the proper laser safety protocols to use in their practice.

Learning Objectives

- Define and discuss parameters pertinent to class 4 laser therapy including the following: wavelength, ionizing & non-ionizing radiation, power, power density, dosage, photochemical, photothermal
- Identify absolute and relative contraindications to class 4 laser therapy
- Discuss the ANSI Z136.3 Standards for Safe Use of Lasers in Health Care Facilities
- Implement proper laser safety protocols into their practice
- Discuss current topics in laser safety, laser treatment adverse events, informed consent and state laws
- Evaluate a fictitious lawsuit involving an alleged adverse event following class 4 therapeutic laser treatment

Friday - 12/07/2018**1pm-2:40pm****Royal Ballroom VI**- Brett Wisniewski, DC, DACBN,
DABCI**Clinical CE****Immune Dysfunction: What Tests to Run and Why****Course Description**

In this stand-alone session, Dr. Wisniewski will review the cells and steps the body takes in a proper immune response. This is a well-orchestrated dance between environment and the immune system that requires cooperation from many different organ systems such as the endocrine system and the microbiome. At times, this response can go awry and lead to chronic issues such as fatigue and autoimmunity. Running the right tests can be the difference between success and failure in these patients, it enhances compliance, and improves patient outcomes.

Learning Objectives

- Understand the complexities of the immune response but be able to take away core concepts to implement immediately
- Learn about the correct tests to run for immune dysfunction, autoimmunity, and chronic illness
- Realize that the immune system has a hand in nearly all conditions in clinical practice ranging from pain to mood disorders

Integration of Chiropractic Care into Mainstream Healthcare

Course Description

Chiropractors often feel isolated in the discussion of mainstream healthcare, believing an equal seat at the healthcare table is far fetched. This class will prove that this isolated thinking is a way of the past, and the future of healthcare depends on integration of chiropractic, now more than ever; yet it is our job to communicate this effectively. We have invited a panel of doctors to illustrate how documentation and record keeping are communication tools that allow us to interact with the allopathic community. Documented results from Gallup Poll #3 will be followed by 4 chiropractors focusing on different areas of interactive success between chiropractors and the medical model, showcasing how the collaborative community has the greatest benefit for patients. If chiropractic is to take a prominent seat at the healthcare table, it will have to do so with research, statistics, an established outlined path as described by the 5 participants in this panel, and in a spirit of cooperation. With the climate of society and ever-changing-healthcare, the time is NOW!

Florida Laws & Rules

Florida Laws & Rules Update: Direct Primary Care

This class is for Florida Doctors ONLY

Course Description

The Florida Laws and Rules course is designed to bring knowledge of Chapter 460 and Florida's new Direct Primary Care law to the attendees of this class. During the class, we will discuss the Florida chiropractor's scope of practice, describing the subsections of the law that show their diagnostic scope of practice, along with their ability to treat from head to toe. We will touch on Florida PIP laws which impact many of our providers and discuss the difference between it and mandatory BI. Then we will instruct the attendees on Direct Primary Care – what it is; how to use it; what is required in an Agreement; how to market it; and its interaction with Medicare and HIPAA HITECH laws.

Learning Objectives

- Compliance manuals required for the Florida practitioner
- Florida's scope of practice under Chapter 360 – what a physician is and is not allowed to treat
- Learning the difference in a mandatory BI world of practice
- Direct Primary Care – the nuts and bolts of the law, how to implement it, and how to market it

Histamine Intolerance: Mood Disorders, Fatigue, and Chronic Illness

Course Description

In this stand-alone session, Dr. Wisniewski will review this potent biogenic amine, histamine. Histamine is famous for the "allergic" response. This is clearly important in acute situations but disregarding histamine for anything other than allergies can be a big mistake. Histamine has the ability to trigger anxiety attacks, gastrointestinal dysfunction, vascular permeability, multiple chemical sensitivity, and much more. Understanding the metabolism of histamine and those compounds that properly modulate its response can be life-changing.

Learning Objectives

- Learn how to detect and define histamine intolerant patients utilizing visual and diagnostic cues
- Learn how to properly test for histamine burden and distinguish between endogenous and exogenous influence
- Expand on anti-histamine concepts beyond allergies as they relate to chronic disease

Why Chiropractors are Uniquely Positioned to Treat TBI's and What the Research has to Say

Course Description

In this 2 hours presentation participants will learn how toxins are a major contributing factor in the 21st Century neurological epidemic. Dr. Patrick Porter (PhD) will share key statistics, symptoms and how these toxins affect your patients, community and practice. The link between chiropractic and brain function will be explored and how the recent outcry for a solution to Traumatic Brain Injuries (TBIs) and the unique qualities of chiropractic have perfectly positioned doctors of chiropractor to handle these cases. Participants will also learn how low level light therapy has helped to bring relief to those suffering from brain stress.

Participants will practice using these cutting-edge insights on how brain stress leads to Sympathetic Survival Syndrome and how specific language patterns can reduce or eliminate patient stress. We will explore the consequences of imbalance between the sympathetic and parasympathetic nervous system and how thoughts can be changed to use the new science of epigenetics to bring the nervous system and brain into balance.

Learning Objectives

- Learn how toxins are a major contributing factor in the 21st Century neurological epidemic
- Learn how low level light therapy has helped to bring relief to those suffering from brain stress

- Practice using these cutting-edge insights on how brain stress leads to Sympathetic Survival Syndrome

Opioid Use in Special Populations: The Impact on your Patients

Course Description

The United States is facing an opioid crisis, have you thought about how this impacts your patients? It is well known that prescription rates for these painkillers vary depending upon geographical location, with southern states demonstrating a higher rate. During this session Dr. Petrocco-Napuli will discuss the impact of the opioid epidemic on special populations throughout the US and how that directly impacts your patient population in Florida. As this crisis does not discriminate, practitioners it is incredibly important that the focus on our varying patient populations be considered: pediatrics, female health: including pregnancy, geriatrics and veteran's. Throughout this session, opioid utilization and the effects on patient centered inter-collaborative care will be discussed.

Learning Objectives

- Discuss and define the impact of the opioid crisis on special populations throughout the United States and Florida
- Describe and discuss provider and patient education strategies related to a non-pharmacological approach to pain management
- Discuss and summarize how chiropractic treatment is an important component to assist in solving this crisis

Real People, Real Results: The Power of Basic Blood Chemistry

Course Description

In this stand-alone session, Dr Kleber will focus on the various components of the metabolic panel. He will explain the meaning of various components of the metabolic panel and discuss the implications of high and low findings within the metabolic panel. He will emphasize the need to understand the pathologies in order to properly diagnosis and treat patient. Actual labs and pathologies will be presented in order to aid the student in understanding the relationship of various pathologies to the metabolic panel.

Learning Objectives

- Learn the various components of a basic metabolic panel. Understand what high and low findings outside the reference ranges of the metabolic panel mean
- See real case studies and understand the meaning of the various components of the metabolic panel and the meanings of abnormal findings
- Add more diagnostic tools to the doctors ability to deferentially diagnose a wider variety of common ailments

Reducing Risk for Females, Tweens, Teens and Young Adults, Oh My!

Course Description

This population of young females seems to be changing by the moment; accelerated age of puberty, increased societal impacts such as medication usage and unnecessary surgical procedures. Due to these external factors practitioners are seeing many conditions arising within this patient population that in the past would affect much older individuals. The age of the patient has become irrelevant to the physiological journey. Educating our families and young women on wellness has never been more important. During this class session a review of this patient populations' most commonly seen conditions along with treatment options and educational strategies will be discussed for easy implementation for Monday morning practice.

Learning Objectives

- Discuss the most commonly seen conditions in the female tweens, teens and young adult population
- Summarize the impact of society on this patient population and how to continue to educate our patients and families on wellness of young females
- Explore a variety of treatment options which correlate to conditions presenting in this patient population
- Discuss patient education strategies for this patient population and how it can have impact on the wellness of these young women

5 Common Mistakes Made When Diagnosing and Treating Thyroid Disorders

Course Description

In this stand-alone session, Dr Kleber will explore the diagnosis and treatment of thyroid disorders. Common practice is limited to often only using TSH as an indicator of thyroid function. Dr Kleber will stress the need to expand the panel to include the free fractions of the hormones. The emphasis will be placed on the autoimmune component of thyroid dysfunction. Dr Kleber will explain the meaning of "Manage the thyroid, Treat the Patient".

Learning Objectives

- Learn the proper tests to run to diagnose the problem with the thyroid so proper treatment can be rendered
- Focus on the autoimmune aspect of thyroid disease. How to properly differentiate various thyroid dysfunctions through proper testing
- Teach how to balance thyroid function and determine what needs to be focused on, not just the replacement of thyroid hormone

Risk Management

Risk Management for General Chiropractic Practice with Implications on CPT Coding, Billing and Documentation

Course Description

The chiropractic physician is exposed to a unique set of risks in clinical practice. The objective of this presentation is to provide an overview of the aggravating and mitigating factors as they pertain to the general chiropractic practice including risks associated with medical billing, CPT coding and medical record keeping. The presentation explores current issues and trends in chiropractic risk management from the 3 main areas complaints arise: (1) Poor doctor-patient communication (2) Clinical errors leading to patient injuries (3) Office environmental factors leading to patient injuries (4) Proper record keeping to support clinical decision making and (5) appropriate CPT coding to support the doctor's treatment plan based on medical necessity.

Learning Objectives

- Discuss the importance of doctor-patient communication
- Review clinical and office environmental factor errors leading to patient injuries
- Learn proper record keeping and the appropriate CPT codes to support treatment plan based on medical necessity

Florida Laws & Rules Update: Direct Primary Care

This class is for Florida Doctors ONLY

Course Description

The Florida Laws and Rules course is designed to bring knowledge of Chapter 460 and Florida's new Direct Primary Care law to the attendees of this class. During the class, we will discuss the Florida chiropractor's scope of practice, describing the subsections of the law that show their diagnostic scope of practice, along with their ability to treat from head to toe. We will touch on Florida PIP laws which impact many of our providers and discuss the difference between it and mandatory BI. Then we will instruct the attendees on Direct Primary Care – what it is; how to use it; what is required in an Agreement; how to market it; and its interaction with Medicare and HIPAA HITECH laws.

Learning Objectives

- Compliance manuals required for the Florida practitioner
- Florida's scope of practice under Chapter 360 – what a physician is and is not allowed to treat
- Learning the difference in a mandatory BI world of practice
- Direct Primary Care – the nuts and bolts of the law, how to implement it, and how to market it

Documentation

Accurate Documentation from a Forensic Viewpoint

Course Description

This 2 hour program will expand the physician's knowledge of documentation, record keeping and coding. The perspective will be from the outsider looking at clinical records during an audit review. The class will also be from an expert witness' perspective for who must evaluate the credibility of the physician's records during a deposition or trial. The current guidelines and scientific evidence will be discussed to determine reasonable utilization parameters. The course will provide the attendee information to be more adept in presenting his/her clinical notes in a more logical and in a manner to increase the credibility of the records. The attendee will be able to document in a more organized manner the next day in the office.

Learning Objectives

- Discuss the current guidelines and scientific evidence to determine reasonable utilization parameters
- Review information to be more adept in presenting his/her clinical notes in a more logical and in a manner to increase the credibility of the records
- Learn how to document in a more organized manner
