

# Integrative Chronic Pain Program (ICPP)

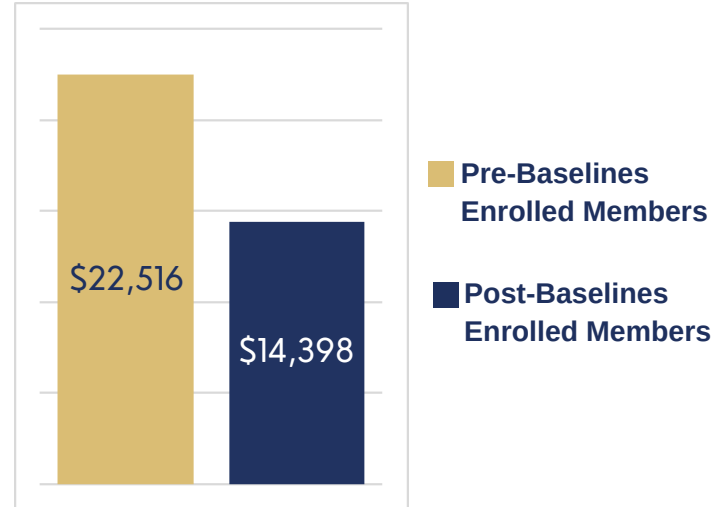

Advanced Medicine Integration Group, L.P.

AMI's ICPP provides an **evidence-based** and **cost-effective** integrative approach versus traditional, pharmaceutically and procedure driven, chronic pain management.

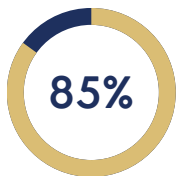

- 1 AMI collects and data mines through historical medical claims data
- 2 Eligible patients are identified through AMI's proprietary, predictive modeling algorithms
- 3 AMI Medical Directors create custom interdisciplinary care plans integrating PCPs, BH vendors/providers, case managers and physical medicine modalities (PT, DC, ACP, LMT.)
- 4 We collaborate with our health plan partners and follow-up with members and their care teams to assess progress for improved patient health.

## Average Annualized PMPY Claim Costs

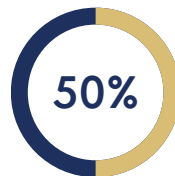

36% Reduction in Annualized Average PMPY Claims Cost

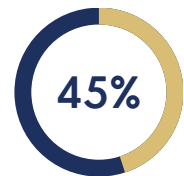

## Program Results Include

Reduction in Opioid Scripts

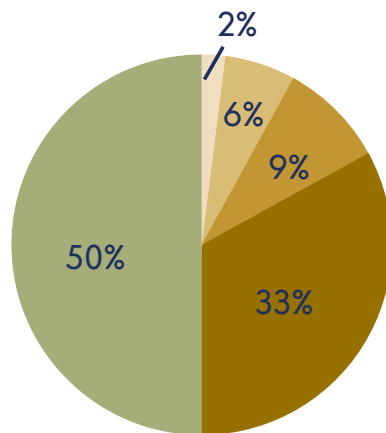

Reduction in Inpatient Admissions

Reduction in ER Visits

## Member Satisfaction Results

- Pain Worsened
- 0% ≤ 10% Improvement
- 10% ≤ 20% Improvement
- 20% ≤ 50% Improvement
- 50% ≥ Improvement

## ICPP Principles

### Health Equity

For patients in need of guidance and access to innovative, integrative medical therapies

### Health Outcomes

Our Integrative Medical Directors ensure specific patient needs are addressed leading to positive clinical outcomes

### Physical Medicine

AMI expands access to Hands-on, integrative care focusing on the patient's mental and physical well-being

### Community Resources

Removing barriers and increasing accessibility for essential resources

AMI offers 20+ years of experience in contracting and credentialing all physical medicine modalities
