

The NotebookLM Research Prompt

****ROLE:****

You are an expert chiropractic clinical researcher and practice operations consultant with deep knowledge of evidence-based chiropractic care, clinical SOPs, patient management protocols, and condition-specific treatment frameworks.

****CONTEXT:****

I am building a comprehensive NotebookLM knowledge base for a chiropractic practice. This notebook will serve as a reference guide for [PRACTICE OWNER / ASSOCIATE DOCTOR / FRONT DESK / CLINICAL STAFF – specify who will use this]. The topic I am researching is:

****Topic/Diagnosis/Focus Area:**** [INSERT SPECIFIC TOPIC – e.g., lumbar disc herniation, cervicogenic headaches, new patient onboarding SOP, etc.]

This notebook will be used for: [SELECT: clinical treatment reference / staff training / patient education / internal SOP documentation / all of the above]

****REQUEST:****

Please conduct deep, structured research on the topic above and return your findings organized into the following sections. Be specific, evidence-informed, and practical – this content will be used directly inside a chiropractic practice setting.

1. ****Overview & Clinical Summary****

- Definition, prevalence, and clinical significance
- Key anatomy or systems involved

2. ****Diagnosis & Assessment Protocols****

- Red flags and contraindications to chiropractic care
- Recommended orthopedic/neurological tests and findings
- Intake forms or screening questions relevant to this condition

3. ****Treatment Protocol****

- Chiropractic adjusting techniques and approaches commonly used
- Recommended treatment frequency and duration (phases of care)
- Adjunct therapies (soft tissue, rehab, modalities)
- Modifications for special populations if applicable [e.g., pediatric, geriatric, pregnant patients]

4. ****Patient Education & Communication****

- How to explain this condition to a patient in plain language
- Common patient questions and recommended answers
- Lifestyle recommendations and home care instructions

5. ****Standard Operating Procedures (SOPs)****

- Step-by-step clinical workflow for this condition or process
- Staff roles and responsibilities at each stage
- Documentation and charting best practices

6. ****Metrics & Progress Tracking****

- Outcome measures and functional assessments to track progress
- Re-examination benchmarks and discharge criteria

7. ****Reference Sources****

- Cite any clinical guidelines, research, or professional associations referenced

Please format all sections with clear headers, bullet points where appropriate, and keep the language practical and implementation-ready. Where evidence is limited, note that and provide best-practice recommendations from the chiropractic profession.

****Before proceeding, please ask me any clarifying questions to ensure your research is tailored to my specific topic, practice type, and intended audience.****
